

Level 1

Admin

The strings that appear in the back office and the content aimed at merchants.

Level 2

Admin.Global

Any string that doesn't fit into a specific category but is still related to the back office and can be found on several pages (for example, "Enabled", or "Settings").

⚠️ If a string is specific to a given page, then it shouldn't be in the Admin.Global domain.

Admin.Actions

All the call-to-actions, buttons, or links that appear in the back office, and that are quite generic (for example, "Save", "Add", or "Delete").

⚠️ If a string is specific to a given page, then it shouldn't be in the Admin.Actions domain.

Admin.Notifications

All the warning, error, or success messages that appear in the back office. They must be general notifications applying to any part of the software (for example, "Settings updated").

⚠️ In case you have a specific notification (for example, "Are you sure you want to upgrade this module?", then it should fall under the notification subdomain for its functional domain, here Admin.Modules.Notification.)

Level 3

Admin.Notifications.**Error**

Admin.Notifications.**Success**

Admin.Notifications.**Warning**

Admin.Notifications.**Info**

Level 1

Admin

The strings that appear in the back office and the content aimed at merchants.

Level 2
